

CanNeed-TLT-200 Top Load Tester

CanNeed-TLT-200 Top Load Tester can measure the top load force, top load deformation, bottle body plane force and side force strength, the test result can be considered as the reference for product improvement and quality control. The tester is convenient operation and easy maintenance.

Specification:

Testing Capacity: 1000N

Force Accuracy: Better than $\pm 1.0\%$

Force Unit : N

Length Unit: mm

Halting Mode: With the upper and lower limit safety setting, programming power and deformation setting, and test sample damage sensing

Point Positioning Mode: Pre-set positioning function

Machine Parts: Precision ball screw, imported high-precision sensor

Machine Size: 250×400×800 mm (W×D×H)

Machine Weight: About 25kg
